Create Schedule Using Zoho Creator

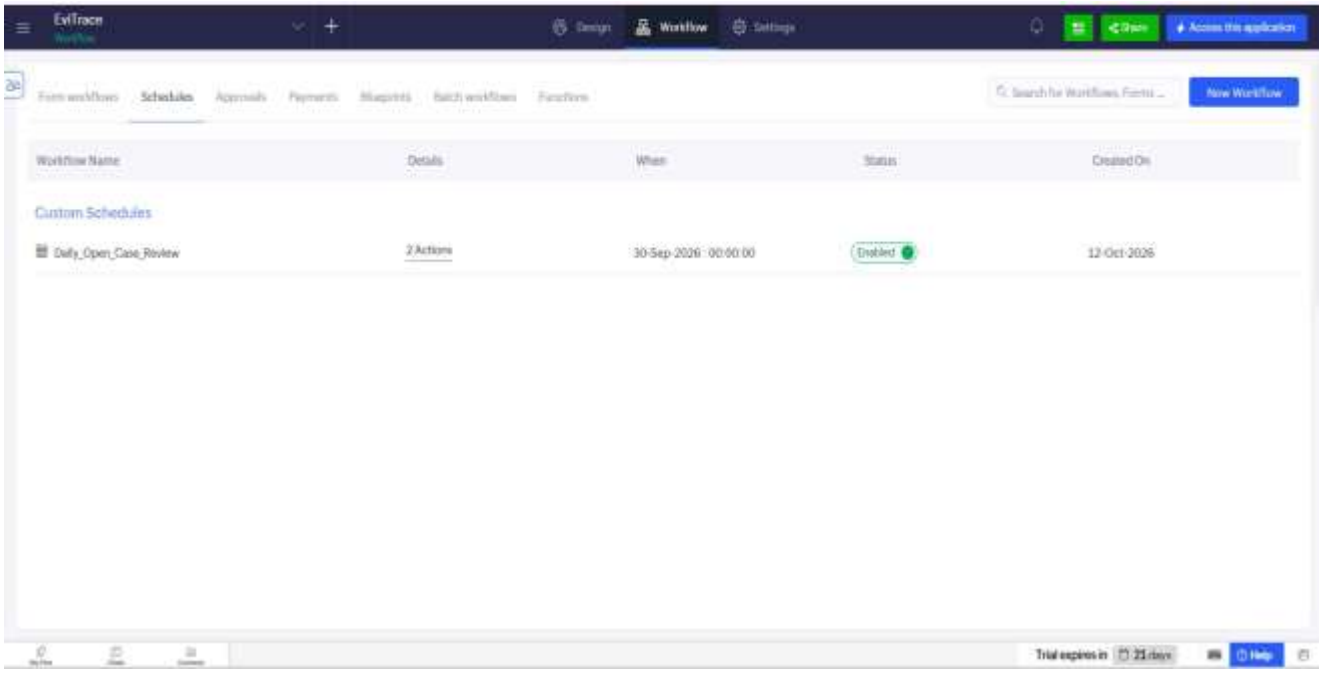

Aim

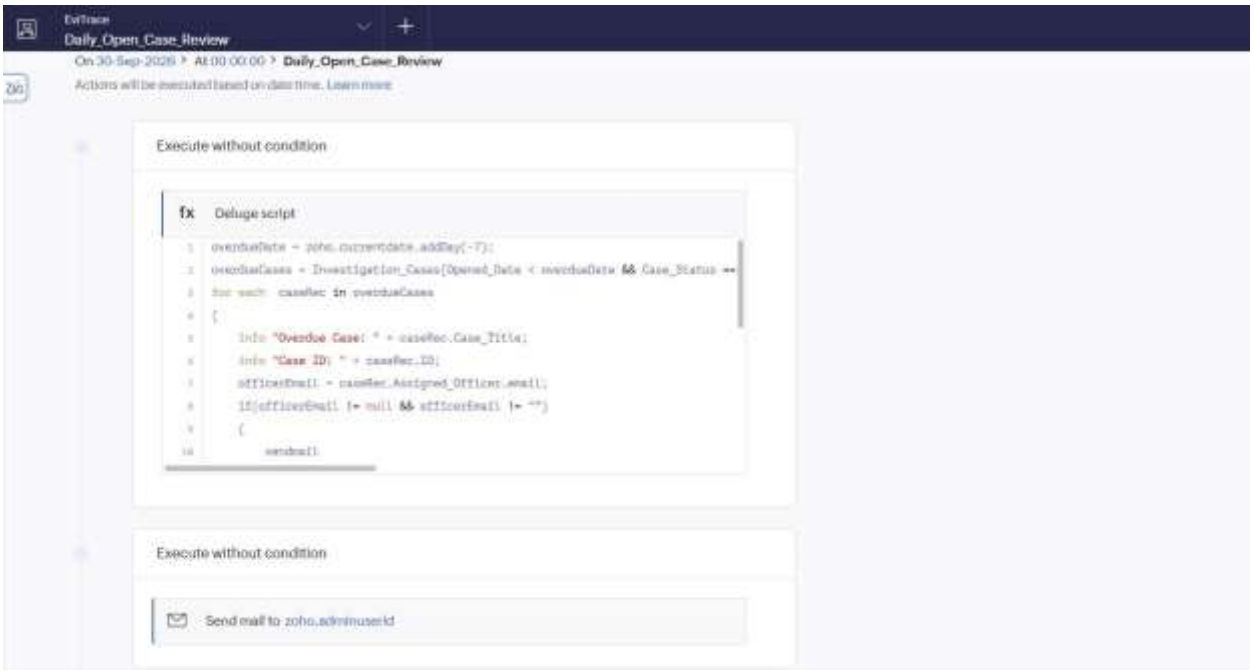

To create a schedule in the Student Academic Management System that automatically performs a task at a specified date and time.

Procedure

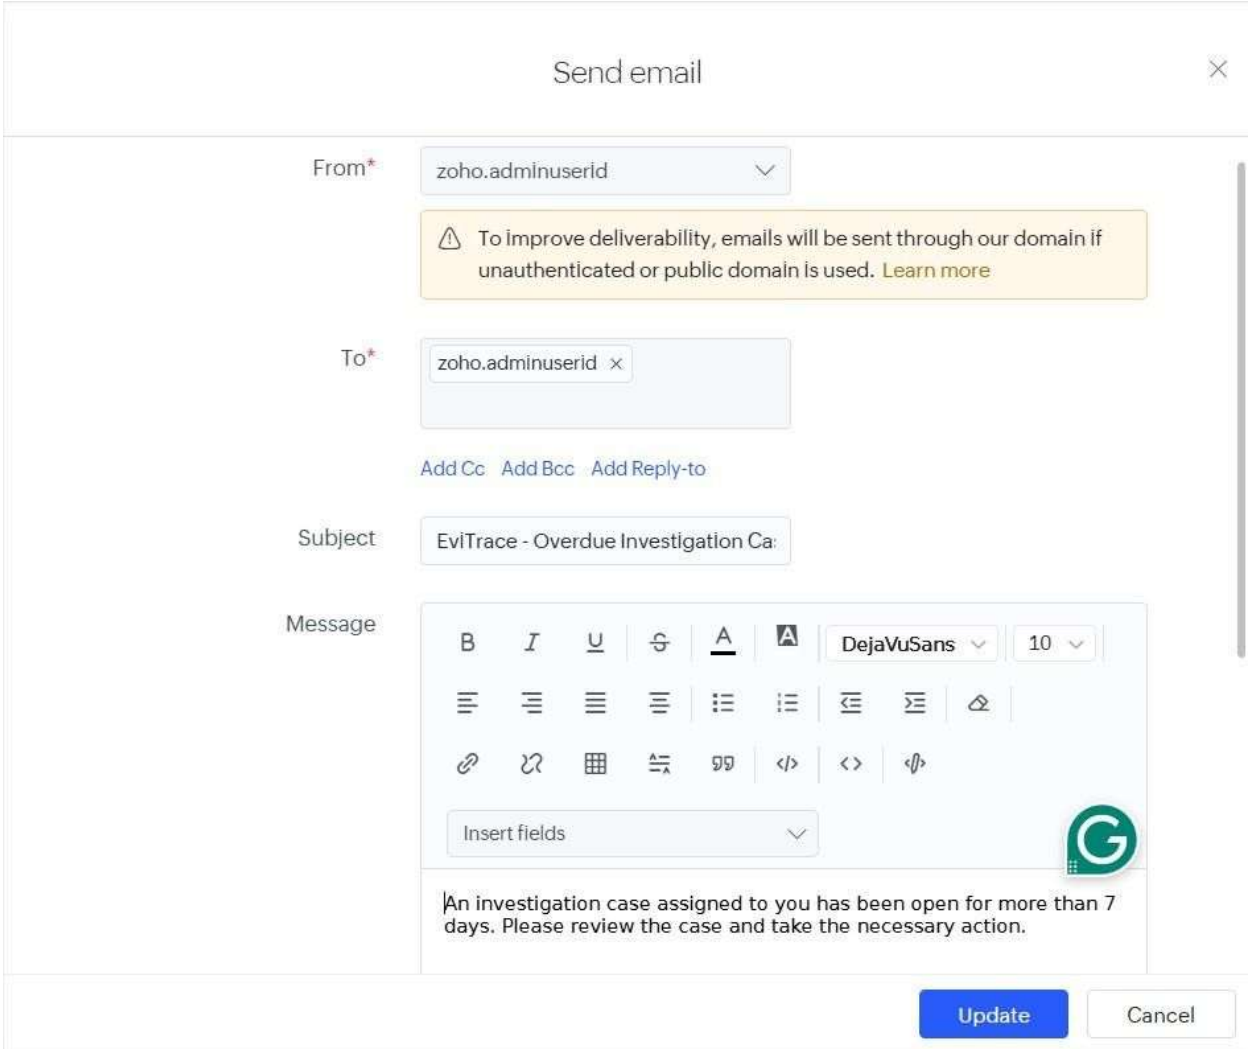

1. Log in to Zoho Creator and open the Student Academic Management System application.
2. Navigate to the Workflow section in the application builder.
3. Select Schedules and click Create Schedule.
4. Enter a suitable schedule name, such as Assignment_Deadline_Reminder.
5. Set the schedule frequency, such as daily, weekly, or monthly.
6. Configure the date, time, and time zone for the schedule.
7. Add the required action using a Deluge script or the available workflow actions.
8. Configure the action to check assignment deadlines and send reminders to students with upcoming submissions.
9. Save and enable the schedule.
10. Test the schedule to ensure it executes at the configured time and performs the intended action.

]
info "Notification sent to assigned officer.";
}
else
{
info "No assigned officer email found for this case.";
}
}

Result

The schedule was created successfully in the Student Academic Management System. It automatically executes the configured task at the specified time,

helping students receive assignment deadline reminders and reducing the need for manual follow-up.
